۴	متن زیر را با دقت بخوانید و به سوالات داده شده پاسخ دهید. A collocation is two or more words combined together. These combinations sound natural to native speakers, but students of English have to learn them with exercise because they are often difficult to guess. The unnatural combinations are wrong for native speakers of English. As an example, the adjective "fast" collocates with "cars" but not with "look." Learning collocations is the most important part of learning the vocabulary of a language. Some collocations seem fixed or very strong. In "take a photo," no word other than "take" collocates with the photo to give the same meaning. The other example is "make an effort" and not "do an effort." Some collocations are more open, because several words may go together to give a similar meaning, for example, "keep to or stick to the rules." Sometimes, a pair of words may not be wrong, and people will understand it, but it may not be the natural collocation. If someone says I did a few mistakes, a fluent speaker of English may understand, but it would probably say, "I made a few mistakes." ❖ True / False 45) A word that is often used naturally is called collocation. a) True b) False 46) In learning the words of a language, learning collocation is important. a) True b) False ❖ Choose the best answer. 47) Which of the following is NOT true about collocation? a) Learning collocations is important b) Collocations can be learned by practice c) Collocations are natural to native speakers d) Guessing collocations is always hard for all 48) According to the passage, which of the following is a natural collocation -----. a) I did a few mistakes b) I did an effort c) fast cars d) fast look ❖ Answer the following questions. 49) Why are some collocations called more open? 50) What is a collocation?	N
	متن زیر را با دقت بخوانید و به سوالات داده شده پاسخ دهید. Most of our energy comes from fossil fuels: oil, coal, and natural gas. Fossil fuels are from plants and animals that lived millions of years ago. They are nonrenewable energy resources since they take millions of years to form, and we cannot replace them easily. By burning oil and coal, we get energy. It may be impossible to find them someday to create this energy. We need to use less energy to save these natural resources for the future. There are many options to lower home energy use with simple changes and good energy habits. It is about being aware of our energy uses. Simple actions can reduce energy consumption. Many people are using more and more energy. It causes our weather conditions to change and may result in higher energy bills. We all need to be more energy efficient and use less, reuse, and recycle it in our homes. Working together to save energy will help us have a healthier planet for future generations. ❖ True / False 51) We have burnt plants and animals as fossil fuels for millions of years. a) True b) False 52) Simple changes and good energy habits lower home energy use. a) True b) False ❖ Choose the best answer. 53) The above passage can provide answer to all following questions Except -----. a) What are the different kinds of fossil fuels? b) Where are fossil fuels from? c) How can we have a healthier planet for future generations? d) When should we use less energy to save natural resources? 54) The underlined word "consumption" is closest in meaning to -----. a) demanding b) saving c) using d) changing ❖ Answer the following questions. 55) What causes our weather conditions to change? 56) Why are fossil fuels nonrenewable energy resources?	O
