ABOUT US

关于我们

佛山市南海区泓鑫磨具科技有限公司于2012年02月21日在广东省佛山市西樵镇注册成立。本公司是一家专业生产陶瓷抛光磨具及其相关金刚石制品企业，从原材料到成品一条龙服务，能够更好的掌控产品质量。2021年工厂占地面积扩大到6万5千平方米。本公司拥有雄厚的实力、先进的生产能力、精湛的技术和一流的管理水平。我们以丰富的磨具生产实践经验为基础，与国内行业著名院校和科研院所合作，不断创新技术，创新产品，为客户的陶瓷加工过程降低更多的成本，提供更高的加工效率，创造更多的价值。以客户需要为目标，以市场为先导，向产品多元化的现代企业而努力。本公司主要生产金刚石弹性磨块、树脂结合剂干磨修边轮、金刚石磨边轮、金刚石精磨修边轮等产品。其广泛应用于陶瓷、石材、玻璃及精密机械加工等领域。产品规格型号齐全，产品质量及性能皆优于同类产品。本公司以质量优先、信誉为准、客户至上为宗旨，为客户提供更出色的产品创造更大的企业效益。

本公司与广东金牌亚洲、广东依诺、广东新一派、广东华陶、佛山市大将军、清远贝斯特、江西华硕控股集团等知名陶瓷企业达成常年合作关系，承包线共计达80余条。

Foshan Nanhai Hongxin Abrasive Technology Co., Ltd. was incorporated in Xiqiao Town, Foshan City, Guangdong Province on February 21, 2012. The company is a professional manufacturer of ceramic polishing abrasives and related diamond products. The one-stop service from raw materials to finished products can better control the product quality. In 2021, the factory will cover an area of 65000 square meters. The company has strong strength, advanced production capacity, superb technology and first-class management level. Based on our rich practical experience in the production of abrasive tools, we cooperate with famous universities and scientific research institutes in the domestic industry to constantly innovate technologies and products, so as to reduce more costs, provide higher processing efficiency and create more value for customers' ceramic processing. Taking customer needs as the goal, taking the market as the guide, and striving for a modern enterprise with diversified products. The company mainly produces diamond elastic grinding blocks, resin bonded dry grinding trimming wheels, diamond grinding wheels, diamond fine grinding trimming wheels and other products. It is widely used in ceramics, stone, glass, precision machining and other fields. The product specifications and models are complete, and the product quality and performance are superior to similar products. With the tenet of quality first, reputation first and customer first, the company provides customers with better products and creates greater enterprise benefits.

The Company has established perennial cooperation with well-known ceramic enterprises such as Guangdong Gold Medal Asia, Guangdong Enoch, Guangdong New School, Guangdong Huatao, Foshan Grand General, Qingyuan Best, Jiangxi Asus Holding Group, etc., with a total of more than 80 contract lines.

CUSTOMER'S TRUST FROM THE PURSUIT OF HIGH STANDARDS

客户的信任源于对高标准的追求

我们从原材料的把控、产品生产工艺、物流发货配送到产品安装交付及售后服务，均严格按照国际管理体系标准进行科学管理。在全体职工的积极配合下，我们顺利通过了ISO9001管理体系的认证监督审核，为企业发展添注一份强劲力量！

诚信是企业发展的基石，作为诚信经营示范单位，我们严格恪守“重质量、重服务、重合同、诚信经营”的核心价值观，以责任驱动创新，以创新驱动发展，不断扩大市场经营，持续完善用户服务，从而走向更加辉煌的明天！

We carry out scientific management in strict accordance with international management system standards from the control of raw materials, product production process, logistics delivery to product installation, delivery and after-sales service. With the active cooperation of all staff, we successfully passed the certification, supervision and audit of the ISO9001 management system, adding a strong force to the development of the enterprise!

Honesty is the cornerstone of enterprise development. As a demonstration unit of honest operation, we strictly adhere to the core value concept of "focusing on quality, service, contract and honest operation", drive innovation with responsibility, drive development with innovation, constantly expand market operation, and continuously improve user service, so as to move towards a more brilliant tomorrow!

胶皮卡座系列

Rubber card holder series

产品特点

- 本皮胶具有优质材料特质，耐寒抗冻，防滑坚固，耐磨耐高温。经久耐用，防止过早老化。良好的耐油性、耐磨性，高强度。

This leather adhesive has the characteristics of high-quality materials, cold resistance and frost resistance, anti-skid and solid, wear resistance and high temperature resistance. Durable to prevent premature aging. Good oil resistance, wear resistance and high strength.

技术参数

度数 Degrees	20-75 度
尺寸 size	L140/L170mm

抛釉磨块系列

Polished glaze grinding block series

产品特点

- 抛釉磨具又称弹性磨块。可安装于普通抛光机上，对仿古砖、仿石砖、抛晶砖、釉面砖等进行砖面的仿形全抛光或半抛光加工。
- 具有仿形好、磨削力强、抛光光泽度高、无磨痕及使用寿命长的特点。

Polished glaze abrasive is also called elastic abrasive block. It can be installed on an ordinary polishing machine to conduct profiling full polishing or semi polishing processing on the surface of antique tiles, stone like tiles, polished crystal tiles, glazed tiles, etc. It has the characteristics of good profiling, strong grinding force, high polishing gloss, no grinding marks and long service life.

纳米防污系列

Nano antifouling series

产品特点

☑ 超洁白纳米抛光系列工具，配合纳米抛光液，在陶瓷抛光砖表面抛磨覆盖一层坚固的纳米持久性保护膜，用于改善和提高陶瓷抛光砖表面的防污和抗磨性能，最大程度的提高陶瓷抛光砖表面的光泽度。

The super clean nano polishing series tools, together with nano polishing solution, are used to polish and cover the surface of ceramic polishing tiles with a layer of solid nano durable protective film, which is used to improve and improve the anti fouling and anti-wear performance of the surface of ceramic polishing tiles and maximize the glossiness of the surface of ceramic polishing tiles.

水磨金刚轮系列

Water grinding diamond wheel series

产品特点

☑ 水磨金刚轮主要用于修正陶瓷四边的垂直度并获得设定的尺寸，是各种规格陶瓷水晶砖、陶瓷砖、抛光砖磨边的必需工具，能很好保证加工产品的尺寸要求及砖边的平滑、不崩边、不崩角，具有锋利度好、寿命长、使用能耗低、工作噪音小、质量稳定、加工效果好等特点。可根据客户要求选择合适配方、粒度搭配，制造各种安装尺寸的产品，广泛应用各种陶瓷加工机械。

The water grinding diamond wheel is mainly used to correct the perpendicularity of the four sides of the ceramic and obtain the set size. It is a necessary tool for edging ceramic crystal tiles, ceramic tiles, and polished tiles of various specifications. It can well ensure the size requirements of the processed products and the smoothness of the tile edges, no edge collapse, no corner collapse. It has the characteristics of good sharpness, long life, low energy consumption, low working noise, stable quality, and good processing effect. We can choose the appropriate formula and particle size matching according to customer requirements, manufacture products with various installation sizes, and widely apply various ceramic processing machines.

树脂修边轮系列

Resin trimming wheel series

倒角轮系列

Chamfer wheel series

M A H O O R

产品特点

- 树脂结合金刚石盘式磨边轮适用于陶瓷砖的精细磨边，加工尺寸精度高，磨边平直光滑。
Resin bonded diamond disc type edging wheel is suitable for fine edging of ceramic tiles, with high machining dimension accuracy and straight and smooth edging.

Φ300	80/140	6/12	105/110/165	25/30/38×15

产品特点

- 倒角轮用于自动流水线上石材、瓷砖四边的倒角。具有良好的动态平衡效果，在高速旋转下具有低震动，锋利高效磨削能力，寿命长性价比高等特点。

The chamfering wheel is used for chamfering the four sides of stone and ceramic tile on the automatic assembly line. It has good dynamic balance effect, low vibration under high-speed rotation, sharp and efficient grinding ability, long service life, high cost performance and other characteristics.
