

How to Turn your LinkedIn into a Job-Winning portfolio in 5 minutes

Step 1:

Go to LinkedIn, click “resources”,
then “Save to PDF”

The screenshot shows the LinkedIn profile of Venkata Naga Sai Kumar Bysani. At the top, there is a banner with the text "select * from Sai_Bysani" and "DATA IS THE NEW GOLD MINE DEEPER, TRANSFORM SMARTER". Below the banner is a circular profile picture of the user. The profile name is "Venkata Naga Sai Kumar Bysani" with a verified badge and "He/Him" pronouns. The bio mentions "Data Scientist | 150K LinkedIn | BCBS Of South Carolina | SQL | Python | AWS | ML | Featured on Times Square, Favikon, Fox, NBC | MS in Data Science at UConn | Proven record in driving insights and predictive analytics |". The location is "New York City Metropolitan Area" and there is a "Contact info" link. The profile has "192,684 followers" and "500+ connections". Below the bio, there are buttons for "Open to", "Add profile section", "View my newsletter", and "Resources". The "Resources" button is highlighted, and a dropdown menu is open showing options: "Send profile in a message", "Save to PDF" (highlighted with a red box), "Saved items", "Activity", and "About this profile". At the bottom, there are analytics for "Analytics" (Private to you) showing "65,940 profile views", "1,205,036 post impressions", and "2,511 search appearances".

Step 2 :

Head to the Gamma.app,
and select "Create new"

Venkata Naga Sai Kumar Bysani

Data Scientist | 150K LinkedIn | BCBS Of South Carolina | SQL | Python | AWS | ML | Featured on Times Square, Favikon, Fox, NBC | MS in Data Science at UConn | Proven record in driving insights and predictive analytics |

New York City Metropolitan Area

Summary

Lead Data Analyst with a passion for driving data-driven strategies, predictive modeling, and team optimization across various industries, including insurance and retail. With over 2 years of experience in data science and analytics, I have a proven track record in reducing churn, improving efficiency, and contributing to millions in annual revenue.

Currently, I lead data initiatives at BCBS of SC, where I develop dashboards, optimize workflows, and build predictive models to support C-Suite decision-making and business strategies. My work spans multiple tools like SQL, Python, AWS, and Power BI to streamline processes and enhance operational efficiency.

Career Highlights:

Optimized workflows, saving 120+ hours of manual work per week, driving efficiency through AWS integration.

Developed real-time dashboards at The LEGO Group, improving sales forecasting accuracy by 15% and decision-making speed by 23%.

Recognized for building predictive models, earning recognition in data science competitions like NESS Statathon (3rd place out of 150 participants).

Beyond my work, I've had the privilege of competing and winning several hackathons and data science competitions, including earning 1st prize at Well4Tech's Data Science Health Hackathon, and NESS Statathon by Travelers. My innovative work has been featured on Times Square billboards, and covered by major media outlets like

Step 6 :

Hit publish, and it's ready!

Because in today's job market,
a portfolio isn't just "nice to
have" – it's your proof of work.

**Resumes tell.
Portfolios show.**

And when you can show your skills in a clean, interactive way, you're no longer just another application in a stack; you're the candidate they remember.

Honestly, this is something I wish I had when I was on my own job hunt; it would've saved me hours and made my applications stand out instantly.
