Where Wellness Begins

The story of Sobhan

As a subsidiary of Barakat Pharmaceutical Holding, Sobhan Darou holds a leading position in Iran in terms of production volume and is recognized as a market leader in central nervous system (CNS) medications.

The company's core activities include research, development, and production of pharmaceutical products.

Originally established in 1976 under the name Soiran Company (a Private Joint Stock Company), Sobhan Darou was founded in collaboration with Ciba Geigy (now Novartis), benefiting from their technical expertise and knowledge.

The company's growth journey began in 1981 with the installation of its manufacturing facility. In 1985, it was renamed Sobhan Pharmaceutical Company, marking a strategic shift toward pharmaceutical development. In 2004, it was officially registered as Sobhan Darou Company, becoming a joint stock company and entering a new era of expansion.

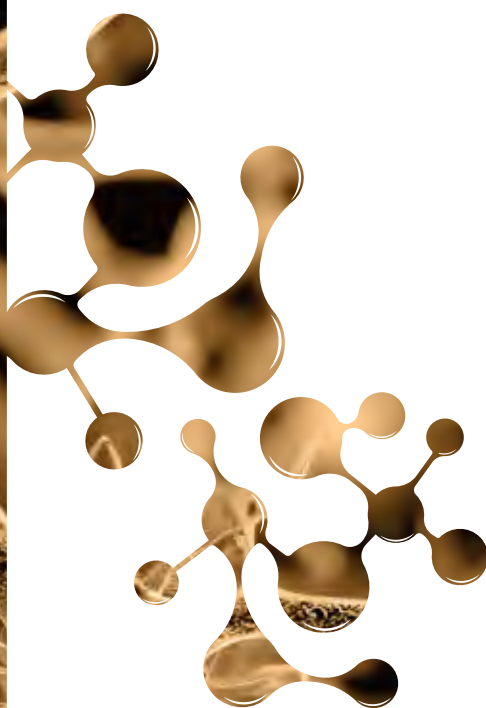

Medications

- Antidepressant Agents
- Antipsychotic Agents
- Anxiolytic and Sedative-Hypnotic Agents
- Antiepileptic Agents
- Antidementia Agents
- Antiparkinson Agents
